

# XXIV. ANNUAL MEETING DG-GT

GERMAN SOCIETY  
FOR GENE THERAPY

**FREIBURG**  
**26.-28.09.2018**

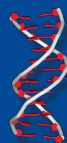

Dear Colleagues,

several developments in human gene therapy, genome editing and cancer immunotherapy have achieved scientific breakthroughs in the last few years and were successfully translated to the clinic. At the XXIV<sup>th</sup> Annual Meeting of the German Society for Gene Therapy (DG-GT) in Freiburg from 26<sup>th</sup> to 28<sup>th</sup> of September 2018, top researchers from all over the world will present their latest results and their cutting-edge developments in cell and gene therapy. The conference will have a special focus on the technological advances made in iPS-derived cell therapies and genome editing as well as the preclinical and clinical implementation of therapeutic approaches to treat immunodeficiencies, infectious diseases and cancer.

We are very much looking forward to welcoming you to the beautiful city of Freiburg.

Toni Cathomen  
*on behalf of the Organizing Committee*
